BREAKFAST IS THE MOST IMPORTANT MEAL OF THE DAY!

BREAKFAST AROUND THE WORLD!

by Christian Olijve

We asked several people what they have for breakfast and what it's typical to eat in their countries. Here's what they told us.

"A typical Greek breakfast would be some cheese and black olives **marinated** in olive oil, garlic and lemon. It's a good start to the day, with a cup of black coffee of course." **Zacharias, Greece**

"A typical breakfast in Mexico is probably "huevos rancheros" (ranch-style eggs) with fried eggs, **tortillas**, rice, beans and chilli sauce. I really like this kind of breakfast but not every morning. Normally, I have scrambled eggs with tomatoes, tortillas and **frijol** beans." **Carolina, Mexico**

"Breakfast for me usually consists of a banana and a **Greek yogurt**, and sometimes I'll add oatmeal, oh, and I can't function properly without a cup of coffee. When I go to eat breakfast in a restaurant, I usually have eggs, toast and bacon, which is more typical." **Roberto, USA**

"I think most people from Spain have coffee, cereal or toast, or some biscuits but I don't really have a big

appetite in the morning because I have to get up really early. So, I usually have some orange juice and cereal with milk. It's also typical here to have "**churros**" (fried sticks of **dough**)." **Carmen, Spain**

"I'm from the Netherlands and a typical breakfast here is wholemeal bread with butter and **Gouda cheese** with a glass of milk. However, I usually have porridge with **soy milk** and some **cinnamon**. I also have some fruit. On special occasions we have croissants with jam, eggs, orange juice and some yoghurt with fresh fruit." **Jochem, The Netherlands**

"A typical breakfast here would be an English breakfast, with sausages, hash browns, bacon, fried eggs and beans, but hardly anyone I know has that in the morning. I usually start the day with some scrambled eggs and tomatoes and fresh orange juice. We have a full English breakfast on special occasions, but we usually go out for it as it's too much **hassle** to make at home." **Cynthia, England**

"Here in South Africa my breakfast mostly consists of a **cappuccino** with some oats, scrambled eggs and

rye toast with peanut butter. On special occasions, we have our own version of the English breakfast with scrambled eggs, rye bread, beef sausages, mushrooms and tomatoes. We love a big breakfast!" **Tom, South Africa** ☺

GRAMMAR BOOSTER

HOW TO TALK ABOUT THE IMPROBABLE FUTURE WITH SECOND CONDITIONALS

Affirmative	Negative	Interrogative
If I saw it, I'd like it.	If I saw it, I wouldn't like it.	If I saw it, would I like it?
If you saw it, you'd like it.	If you saw it, you wouldn't like it.	If you saw it, would you like it?
If he saw it, he'd like it.	If he saw it, he wouldn't like it.	If he saw it, would he like it?
If she saw it, she'd like it.	If she saw it, she wouldn't like it.	If she saw it, would she like it?
If it saw it, it'd like it.	If it saw it, it wouldn't like it.	If it saw it, would it like it?
If we saw it, we'd like it.	If we saw it, we wouldn't like it.	If we saw it, would we like it?
If they saw it, they'd like it.	If they saw it, they wouldn't like it.	If they saw it, would they like it?

The full forms are: I'd = I would; you'd = you would; he'd = he would; she'd = she would; we'd = we would; they'd = they would.
The negative contraction is: wouldn't = would not.

We form Second Conditionals with *If* + a Past Simple verb, followed by another clause with *would* + an infinitive without "to". We often use the contracted forms *I'd*, *you'd*, etc. For example: "If you went to the party, you'd have a good time."

We use Second Conditional sentences to talk about imaginary situations in the future. Although we're using Past Simple verbs, we're actually talking about the present or future. For example: "If they went by bus, they'd get there more quickly."

We can use Second Conditionals to refer to something that might happen if a certain condition is met. For example: "If she bought it now, it'd be a lot cheaper."

We often use *were* instead of *was* with *I*, *he*, *she*, *it*. For example: "If I were you, I'd leave right now."

We can also use *could* with the Second Conditional to talk about future possibility.

For example: "If we took the train, we could play cards."

We can use question words (*who*, *what*, *when*, *where*, *why*, etc.) with the Second Conditional. For example: "What would you do if you found a wallet in the street?"

Sam: Oh, no one. I'll get it. [She goes outside.]

Brian: [He goes outside.] What's this?

B: Well, I saw this really cute dog...
P: Yes, and?
B: And, well, you know how it is...
P: No, I don't know.
B: Well, one thing led to another and... [woof, woof]
P: Oh, no!
B: I'm sure he'll get on really well with your cat. [cat hissing]
P: That remains to be seen!
B: Erm, and that's not all.
P: What? [sound of a parrot squawking]
B: Isn't he funny?
P: Give me that credit card, NOW! ☺

What sort of food do you eat?

Tal (Belgium, Web Designer)

Tasty, sugary, sweet food. I don't know if biscuits and **cookies** and **candy** count like food, but that would be the kind of food I eat. And otherwise... salad? Or... lately I've really **gotten into** hamburgers. I have them at least once a week.

Well, just vegetables, meat, some fresh fruit... and I *love* to eat ice cream – chocolate ice cream.

Ashleigh (USA, English Teacher)

What sort of food do I eat? Erm... I eat a lot of... I would say I eat a lot of **ethnic food**, a lot of rice and beans, and also a lot of fruits... a lot of soup.

Remember!
When people talk informally, they often use non-standard English.

Julio (Brazil, Management Consultant)

Well... I like pasta a lot. But... I eat almost everything. I just don't like fish.

Laura H (USA, English teacher)

I will eat just about anything, but when I cook for myself I **tend** to cook mostly vegetarian. Just because I really, really love beans, and veggies, and any type of **legume** or fruit. [OK] I also cook mostly vegetarian because meat tends to be kind of expensive.

THE CANTONESE CHINESE ENGLISH ACCENT

This month, we're looking at the Cantonese Chinese English accent.

By Ariel and Colleen.

I SPEAK CANTONESE CHINESE ENGLISH!

Canton is an area of China where they speak Cantonese, a form of Chinese. Hong Kong is an important Cantonese city. It was a British colony until 1997, but now forms a part of China. Hong Kong has a population of around 7 million people. Other important Cantonese cities include Macao, Guangdong and Shenzhen.

There are several special features of the Cantonese Chinese English accent. For a start, we don't have the /aʊ/ sound in Cantonese. So, it's hard for Cantonese speakers to pronounce words such as "down", which we pronounce as /daʊ/. Other difficult words with this sound are "town" and "around". Another difficult sound for us is the /θ/ sound. A

common mistake is to say "free" instead of "three", "fank you" instead of "thank you", "feory" instead of "theory" or "fick" instead of "thick".

The /ɔɪ/ sound is also hard for us. For example, we have difficulty pronouncing words such as "point", which we might pronounce as /pɔɪnt/. Other difficult words with this sound are "coin" and "join".

It's quite common for Cantonese speakers to mix up the words that start with "l" and "n", such as "light" and "night". So, we might pronounce both of these words as "light".

Here's a little story so you can hear me speaking in a Cantonese Chinese English accent.

Story: the drink

Once, my friend and I went to Barcelona. My friend was very tired and thirsty after shopping, so we went to a food market to get a drink. We found a shop that had a bottle for a euro. So, she chose a bottle of orange juice. At the time, she didn't speak much Spanish, so she spoke in English to the shop assistant. After paying the one euro, the shop assistant gave my friend another bottle and said "Free!" But my friend misunderstood her and thought she was saying "Three!" She couldn't understand why it was just one euro for one bottle,

but three euros for two bottles. So, my friend said "No!" and refused to take the extra bottle. The sales assistant kept saying "Free! Free!", but my friend refused to take it. Eventually, the shop assistant gave up and put the bottle back. But later, as we were walking home, we passed by the shop again and noticed a sign in the window that said, "2X1" (two for one), which means, you get two bottles for the price of one. And it was then that my friend realised that the salesperson had been saying "Free", not "three"! 🙄

Places made famous by films

by Christian Olijve

Famous places often appear in films. But sometimes, a place can become famous because of a movie. Here are six of them.

The fire station from *Ghostbusters*

Location: 14 North Moore Street, New York (USA). This

comedy starred Bill Murray and Sigourney Weaver and is about three **parapsychologists** who start a ghost catching business. They use a fire station in New York as their headquarters. The actual **fire station** is a popular **landmark** and fans of the film often take pictures of themselves there.

The bookshop in *Notting Hill*

Location: 142 Portobello Road, London (England).

This bookshop in London became famous after William Thacker (played by Hugh Grant) met Anna Scott (played by Julia Roberts) there in a scene from the romantic comedy *Notting Hill*. Unfortunately, it never **survived** as a bookstore and eventually became a shoe shop.

Tiffany's, from *Breakfast At Tiffany's*

Location: 727 Fifth Avenue, New York City (USA). *Breakfast*

At Tiffany's is a romantic comedy starring Audrey Hepburn and George Peppard. Hepburn plays a young woman who becomes interested in a

man who has just moved into her **apartment building**. Tiffany's (also known as Tiffany & Co.) is a luxury goods and jewellery shop that appears several times in the film.

The bench from *Fault In Our Stars*

Location: Prinsengracht 263-267, Amsterdam (The Netherlands).

Fault in our Stars is the **heartbreaking** story of two young cancer patients who fall in love. It stars Shailene Woodley and Ansel Elgort. The **bench** features in the film and is where the main characters share a special moment (including a kiss). The **local council** removed the bench for a time, but it was returned by popular demand after **complaints** from fans of the film.

The family home from *Mrs Doubtfire*

Location: 2560 Steiner Street, San Francisco (USA).

Mrs Doubtfire is about out-of-work **voice-over artist** Daniel Hillard (played by Robin Williams). After his wife files for divorce, Daniel desperately wants to be with his children, so he **pretends** to be a **nanny** so he can take care of them. The actual house where the film was set is a popular tourist destination. The home is now owned by a San Francisco plastic surgeon. On hearing of the death of actor Robin Williams, fans **paid their respects** by leaving notes and flowers outside the house.

The hotel from *The Shining*

Location: Timberline Lodge,

27500 West Leg Road, Oregon (USA).

“All work and no play makes Jack a dull boy,” were the famous words spoken by frustrated writer Jack Torrance (played by Jack Nicholson). Jack and his family spend the winter at the **isolated** Overlook Hotel where strange things start happening. The hotel used for **exterior shots** in the movie is Timberline Lodge, which is on the south side of Mount Hood in Oregon (USA). It was built in the late 1930s and is a popular tourist attraction for fans of the movie. ☺

the superstar thought it would be a good idea to sell it for charity. And as she claims to have caught the cold from fellow-actor Samuel L. Jackson, the tissue has double celebrity value. ✪

IG NOBELS – PRIZES FOR UNUSUAL SCIENTIFIC RESEARCH!

Ig Nobels are prizes for unusual scientific research – the kind of research that makes you laugh, then makes you think. The award ceremony for the prizes is organised by science magazine *The Annals of Improbable Research*, and takes place at Harvard University. Here are some of the winners.

This year's neuroscience prize went to a team from China for trying to understand what happens in the brains of people who see the face of Jesus on a piece of toast. Their paper was titled, "Seeing Jesus in Toast: Neural and Behavioral Correlates of Face Pareidolia". Very useful!

This year's psychology prize went to a joint team from Australia, the UK and the USA for collecting evidence that shows that people who stay up late are, on average, more self-admiring, more manipulative, and more psychopathic than people who get up early in the morning. Their paper was called "Creatures of the Night: Chronotypes and the Dark Triad Traits". Scary!

The biology prize went to a joint team from the Czech Republic, Germany and Zambia for doing research on

the way dogs go to the toilet. They discovered that canines prefer to align their body axis with the Earth's north-south geomagnetic field lines. Their paper was titled "Dogs are sensitive to small variations of the Earth's magnetic field". Fascinating!

The physics prize went to a team from Japan for measuring the amount of friction between a shoe and a banana skin, and between a banana skin and the floor, when a person steps on a banana skin that's on the floor. Their research could help ensure that no one ever slips on a banana skin again. Safety first!

And finally, the Arctic science prize went to a team from Norway for recording the reactions of reindeer on seeing humans who are disguised as polar bears. Their paper was titled, "Response Behaviors of Svalbard Reindeer towards Humans and Humans Disguised as Polar Bears on Edgeøya". As part of the research, they measured response distances for reindeer from a stalking polar bear, and compared this to the responses from the reindeer to a person disguised as a polar bear.

Whatever next? 🐾

* IG NOBELS

HOW TO BECOME AN eBAY MILLIONAIRE!

Want to become a millionaire? Why not start selling things on eBay? Many people have made a fortune buying and selling on the online retailer. And thousands are now millionaires. Here are a few.

One eBay millionaire is American Ethan Dekel. He sells luxury designer menswear at 40% to 80% below **retail prices**. In an interview with *entrepreneur.com*, Ethan recalls how it was a **relative** with a clothing shop who **got him into** the fashion business. "My uncle asked me to help him **liquidate** some designer suits on the internet. Right away, I thought of eBay," Ethan says. "When the first suit sold for a 300% profit, a **light went on in my head**." The same uncle helped him find **wholesale suppliers** – one of the biggest **hurdles** for those starting on eBay.

Alison Abruneiras is another eBay millionaire. She left school with no qualifications and had no business experience. She now **runs** The Nail and Beauty Emporium, a successful **cosmetic retail business**. She started out selling from her house, but now trades worldwide and has a **warehouse** with employees. "It's incredible to think that this started on a computer in my bedroom," she said in an interview with the *Daily Mail*. "If I can do it, anyone can. You don't have to have an education," she added. So, how did it all start. "I bought £3,000 worth of products from a **wholesaler** and stored them in my bedroom – which had become my office," she explained. "Within two weeks I'd sold nearly all of that too

and more than **doubled my money**. From then, it became an addiction. I'd be on the computer first thing in the morning and up until midnight."

David Wirtenberg is another **ecommerce** millionaire. He sells engagement rings, wedding bands and other jewellery. He recalls how it was his father-in-law who helped him at first. "He said, 'Let's see if we can sell jewellery on the internet. So, I went to 47th Street in Manhattan. I knocked on every door. I didn't know anything about diamonds at the time. I was looking for suppliers, for an education, anything.'" He ended up buying a couple of diamond rings, and he immediately sold them for a profit and it all went from there. "Most of my diamond **auctions** start at 99 cents. Sometimes I lose money; sometimes I make money. Whatever makes the customer happy, I do. Our **packaging** is second to none. Sometimes we pack our diamonds in **Fabergé eggs** [for free]. Once you have customers, you have those customers for good."

Preparing for a wedding can be stressful. There's so much to think about and a lot can go wrong... as these wedding disasters clearly show.

Wedding arrest

A young **bride** from Connecticut (USA) was arrested at her wedding after getting drunk and throwing cake and glasses at her new husband. **Witnesses** said she "flipped out" when the bar at the **reception** stopped serving drinks for the night.

Rice attack

Instead of throwing a **handful** of rice at the **happy couple** as they came out of the church, an 88-year-old wedding guest accidentally threw her glass of wine at them, including the actual glass. The glass missed the bride, but **struck** the **groom** in the eye. He was rushed to hospital, where he was treated for **minor trauma**.

Bomb scare

A young man from Liverpool was arrested after causing a **bomb scare**. The unfortunate man had forgotten to book the **registry office** for the wedding, but **didn't have the heart** to tell his fiancée. So, he called them up and said that a bomb had been left inside

the building. He's now facing a jail sentence after admitting to the hoax call.

Wedding fall

Almost a whole wedding party fell into a **lake** after the **jetty** they were standing on collapsed. The group, who were in a wedding in Crosslake, Minnesota, were waiting for a photo to be taken when the wooden structure broke under their weight.

Wedding fight

A couple's wedding celebrations were interrupted by a **brawl** over a **pork pie**. Police were called to deal with what was later described as a "large fight" in which one woman had her ear bitten. Apparently, the fight broke out after one guest **reached** for the last pork pie but it was **grabbed** by another guest at the last minute.

Bouquet crash

A couple **hired** a small plane to fly past their guests and drop the bride's **bouquet** to a line of women standing below. But as the plane flew over the crowd the flowers were **sucked back** into the engine, causing it to catch fire and explode. Fortunately, the pilot only suffered minor injuries. 🍀

8 WAYS TO LEARN ENGLISH GRAMMAR!

How useful is **grammar** for learning a language? And what can you do to improve your knowledge of it?

**Verb tables

Here's a verb table for the Past Simple.

Affirmative	Negative	Interrogative
I saw a good film.	I didn't see a good film.	Did I see a good film?
You saw a good film.	You didn't see a good film.	Did you see a good film?
He saw a good film.	He didn't see a good film.	Did he see a good film?
She saw a good film.	She didn't see a good film.	Did she see a good film?
It saw a good film.	It didn't see a good film.	Did it see a good film?
We saw a good film.	We didn't see a good film.	Did we see a good film?
They saw a good film.	They didn't see a good film.	Did they see a good film?

Grammar *alone* isn't going to help you speak a language.

However, learning some basic **patterns** can be useful. For example, if you know the negative past tense is formed with *didn't* + a verb, you can produce hundreds of useful sentences: *I didn't go, she didn't see it, we didn't do it...* So, what can you do to improve your knowledge of grammar? There are two things: firstly, you need to learn how to *form* sentences; secondly, you need to know how to use the structures. Here are 8 things you can do to achieve those two objectives:

Forming basic structures

1 Verb tenses

When it comes to studying grammar, the best thing you can do is to focus on **verb tenses*** as this will help you communicate in English. Firstly, you need to find out how the tenses are formed. In order to do this, simply get hold of a grammar book, choose a tense and read about it. Then, do some basic exercises online or in an exercise book to practise forming the structure.

2 Verb tables

A good way to learn how to form tenses is by **memorising verb tables****.

A basic verb table will show you how verbs are **conjugated**. In order to memorise the verb tables you could study them for a bit, then try to write them out yourself without looking. Having the structures firmly in your head will make reproducing them much easier. And you won't have to think or translate –

the structures will just come out automatically.

3 Grammatical sentences

Another good method is to create a list of grammatical sentences. For example, if you were focusing on the Present Simple, you could write sentences like, "Keira lives in America", or "Jack doesn't like it." Then, make a recording of the sentences (or get a native speaker to do it for you). In your free-time, you can listen to the sentences and repeat them out loud after the speaker. The idea is to practise them until you've **learnt them by heart** and you can say them without thinking.

4 Grammar drills

You can also use grammar drills to develop your ability to form negatives or questions. You can do them on your own, with a friend or with your teacher. Simply say a sentence in a particular tense, then create the negative or question forms. For example: *She went to the shops. / She didn't go to the shops. / Did she go to the shops?* You could use your list of grammatical sentences from the previous paragraph for this.

Understanding how to use basic structures

Now comes the hard part: learning how to use the structures.

5 An overview

The first thing you want to do is to get a quick overview of how the verb tenses are used. For example, most basic grammar books will

tell you that the Present Simple is sometimes used for giving opinions: *I think it's good / We don't like it*. Most verb tenses have a few basic "rules" of usage like this that you can learn in a matter of minutes.

6 Using the language

Once you've got a basic understanding of the tenses, you need to practise using them when you're speaking or writing. You also need to read and listen to lots of English so you can see the language in context.

7 Common mistakes

As you're speaking or writing, make a note of any mistakes you make, or ask a teacher or friend to help you. Then, work on trying to eliminate these mistakes. For example, if you keep saying, "**He like it**" instead of "He likes it". Try repeating the sentence 10 times a day until you've got it firmly implanted in your mind.

8 Reading & listening

However, the best way to improve your knowledge of grammar is by reading and listening. Children learn their first language without studying any grammar – they simply **pick it up** naturally by being **exposed** to it. You can do the same if you read and listen to English enough. In fact, the more you read and listen, the more language you'll **absorb**, and the more you'll see how the language **fits together** (which is what grammar is all about). So, read articles in English, watch TV series, listen to the news, read a magazine, watch YouTube videos, read a graded reader, listen to audio

files from language courses... the options are limitless!

Language is all about communication – it isn't a set of rules. And the end objective isn't to have perfect "grammar", it's to communicate effectively. Grammar has its part to play, but it shouldn't be the central focus of your learning. It's interesting to find out about the order of adjectives, the use of articles, or the position of adverbs. However, you'll learn much more through reading, listening, writing and speaking the language! ✨

*VERB TENSES

Think about it What online retail websites or apps have you heard of? Have you ever used any of them? What was it like? Did you manage to buy or sell anything? How easy was the site or app to use? Why do you think eBay is so successful? What makes eBay different from other online retailers? What's the key to its success?

MR eBAY

PIERRE Omidyar

Pierre Omidyar is the founder of the online retailer **eBay**. With sales of around \$20 billion per year and more than 200 million registered users, eBay processes more **transactions** than any other company in the world. Here are five important tips that took Pierre to the top.

1 Follow your passion

Pierre puts passion first. "Like most software people, it's very much passion more than anything else – the ability to create software that could benefit or have an impact on people that used it was what was **driving** me," he says. If you love what you do, you'll never do a day's work, so the saying goes.

2 Believe in the power of the individual

Pierre believes that it's important to "recognise and respect everyone as a **unique** individual". In creating his online **auction** empire in 1993, Pierre wanted to **empower** individuals. So, he provided a **feedback forum** where both buyers and sellers could **exchange tips**, solve problems and **rate** their purchasing experiences.

3 Treat your customers with the respect they deserve

eBay's rapid **expansion** didn't come without its problems. But it's how these problems are managed that shows a company's true character and strength. In 1999,

the site experienced numerous service **disruptions**, one lasting 22 hours. Pierre reacted quickly and responsibly by getting his team to make 10,000 phone calls to the top customers to **apologise** for the **inconvenience**. He assured them that eBay was doing everything possible to deal with the problem.

4 Understand human nature

Pierre thinks that there's a natural **trader** in everyone. He understands that people love to buy things, and that many have a "**one man's junk is another man's treasure**" philosophy. And this is the key to the success of eBay, where you can sell just about anything from broken **trainers** to **rusty** spanners to **scratched** records. "Fundamentally, everything we do in human activities is related to **trade**," Pierre once said. There's no better way to succeed in business than having good **insight** into human behaviour.

5 Prepare for the unexpected

In an often repeated story, Pierre originally set up an online auction site just to help his wife sell and collect **Pez candy dispensers**. Although he admitted in an interview with the Academy of Achievement that the story had been invented, he still advises potential entrepreneurs to "prepare for the unexpected". "You'll know you're successful when the platform you've built serves you in unexpected ways," he added. ✪

Bio - Pierre Omidyar

Pierre Omidyar is the founder and **chairman** of eBay. He was born in Paris (France) in 1967 to Iranian parents. When he was still a young child, they moved to the USA. eBay has its headquarters in San Jose, California and was founded in September 1995. It was originally called Auction Web. The first item sold on the site was a broken laser pointer. Pierre became a billionaire at the age of 31 with eBay's 1998 **IPO** (Initial Public Offering). Pierre lives in Hawaii with his wife Pamela and their three children. According to *Forbes*, he's worth approximately \$8.5 billion. Omidyar and his wife Pamela are well-known **philanthropists**.

TRACK 19: ENGLISHMAN & US MAN

IT'S ALL A CON!

WATCH OUT FOR THE CON ARTISTS!

Con artists are expert thieves who could quite easily convince you to lend them money, **invest** with them, or write them a cheque. They're **confidence tricksters** who can **pose as** police officers, lawyers, bankers or doctors to **gain your trust** then break that trust. Here are three famous con artists.

1 The rock legend

Phillip Schaeffer from Minnesota avoided paying expensive bills at a private hospital by claiming he was Pink Floyd rock legend David Gilmour. Another time, he told staff at a different medical centre that he was Rush guitarist Alex Lifeson. On each occasion, he informed staff that his **agent** would deal with the bills. However, admin staff at one of the hospitals became suspicious. The security supervisor reviewed camera shots of Schaeffer entering the hospital. He then compared them to pictures of the Pink Floyd singer-guitarist, and soon realised that the man wasn't who he claimed to be. When Schaeffer returned to the hospital four days later, he was **confronted** by a police officer who happened to be there at the time. Schaeffer admitted that he'd been lying and was taken to Stearns County Jail on a charge of theft by **swindle**.

2 The banker

Christophe Rocancourt (born July 1967) is a French confidence trickster who **scammed** rich people. For his first big **con** he **faked** the **deed** to a house he didn't own, then sold the property for \$1.4 million. With the police **hot on his trail**,

Christophe made his way to the United States. While in Los Angeles, he pretended to be a movie producer, an ex-boxing champion and a **venture capitalist**, among many other things. He **dropped names** like "his mother" Sophia Loren or "his uncle" Dino De Laurentiis, and claimed to be a French member of the **Rockefeller** family. He lived for a time with Mickey Rourke, and was also friends with actor Jean-Claude Van Damme. During his time there, he persuaded wealthy people to invest in his financial schemes, then ran off with their money. Many were too **embarrassed** to report him to the police. He **fled** to Canada, but was eventually captured and sentenced to five years in prison.

3 The pilot

Frank William Abagnale, Jr. (born 27th April 1948) is the **inspiration** behind the Steven Spielberg film *Catch Me if you Can*. He had at least eight **aliases**, and escaped from police custody twice (once from a moving aeroplane) – and all that before he was 21 years old. Incredibly, between the ages of 16 and 18, he flew over 1,600,000 km for free on over 250 flights to 26 countries by posing as a Pan Am pilot. He got a uniform by calling the airline headquarters and telling them that he'd lost his. Later, he made a fake employee ID card, and **forged** a Federal Aviation Administration pilot's licence. As a company pilot, he was able to stay at hotels for free, with all food and hotel bills sent to the airline. Frank was eventually caught

and sentenced to 12 years in prison. However, he served less than five years before starting to work for the FBI (for no pay initially), helping them identify **scams**.

What a change! ☺

1. What problems could maths (and science) help us solve, according to Julie Dunkle?

5. What has the UK government spent some of the £11 million on in order to raise standards?
6. What happens if you don't do too well on the National Numeracy online maths challenge?

HOW MATHS CAN SAVE THE ECONOMY!

Maths can help create a more competitive economy... and get you a better job. But how?

Experts believe that maths is the **key** to creating a competitive economy. "Fluency in maths is needed to understand science, and science creates the innovations that will help solve the **challenges** we face, such as **swine flu** and **global warming**," explained Julie Dunkle, US education project manager for Intel in an article for the *Wall Street Journal*.

There's even been a study on the **link** between maths and a healthy economy. Eric Hanushek, a Stanford University professor, concluded that increasing test scores in maths could add two-thirds of a percentage point to the annual growth rate in **GDP**. Interestingly, Hanushek's study measured quality (improvement in test scores) rather than quantity (years of schooling).

The problem is that many people **struggle with** maths. In the UK, a survey of more than 2,300 adults found that a third of over 18s found it hard to calculate change in shops, and weigh and measure ingredients; and many parents have problems helping their children with their homework. Almost 25% rated their maths as no better than "satisfactory", and a further 7% said their

skills were "poor" or "very poor".

In the UK, it's thought that poor maths skills could be costing the economy more than £20 billion a year. But poor maths can affect your **job prospects** too. "A lack of everyday number skills not only **threatens** the economy and the competitiveness on the country's job market but can also ruin an individual's chances in life...", said Graham Beale, the Nationwide Building Society's chief executive. "Maths commands the highest earnings in the jobs market and is the best protection against unemployment," he added.

So, what's the government doing about it? Firstly, they've recruited some Chinese maths teachers as part of an £110m programme to **raise standards**. "Good maths comes with constant practice but there seems to be an **aversion to practice** in this country. We have a lot to learn from China," said Nick Gibb, the former Conservative Schools Minister. As part of the scheme, Chinese teachers will be sent to work in English schools.

The charity National Numeracy has also created an online maths challenge for adults. After taking the test, and depending on the results, adults are referred to a series of learning resources to **boost** their skills. The

move has been **backed** by the Department for Education.

So, how good are you at maths in English? Listen to the following questions and write down your answers. Then, check the Answers page to see how well you've done. 🌟

In the world of **diplomacy**, it's common to offer **gifts** to visiting kings, queens, presidents and prime ministers; or to bring presents for representatives of a **host country**. The gifts range from the ordinary to the **absurd**. Here are a few examples.

The royal family receives a lot of gifts, some of which are really unusual. A list from 2013 included a state **coach** made out of chocolate, a portrait of the Queen burnt into tree bark, a plastic stand-up angel, a garden gnome and a book titled *Your Arms Remind Me of Pork Luncheon Meat*.

Sometimes, the royals are given **live** animals. In 1764, King George III was presented with a cheetah while in India; and in 1827, King George IV was given a giraffe by the **pasha** of Egypt. The present-day Queen has received two black beavers from Canada, and was once given an elephant and a crocodile during a visit to Gambia.

President Obama seems to be popular, **judging by** the number of gifts he receives. Canadian Prime Minister Stephen Harper once gave Mr Obama a ball signed by the 2011 Toronto Raptors professional basketball team, as well as a golden-framed, 19th-century antique map of North America. Queen Elizabeth II presented the president with a leather-bound volume entitled *A Selection of Papers*

From the Royal Archives 1834-1897, and a **brooch** with **gold leaves** to First Lady Michelle Obama. Prince Charles once gave the Obamas a 15-piece **china tea set**.

Nicolas Sarkozy (the ex president of France) is an extremely generous gift-giver. In 2011, he gave the Obamas presents worth more than \$40,000. The list of goodies included a large black Hermès golf accessory bag, two Baccarat **crystal** table lamps on silver **pedestals**, a **monogrammed** black leather Louis Vuitton business bag, and a glass sculpture of Alexander the Great's horse.

Others aren't quite so imaginative. On a visit to China, David Cameron gave the Chinese Premier Li Keqiang a collection of books, a pair of gloves and a tennis racket signed by Andy Murray, among other things. In return, Cameron received a painting of a horse, and a model of a Chinese bullet train. And Cameron gave Russian leader Vladimir Putin a framed photo of the pair of them watching the judo at the London Olympics. Cameron got a bottle of Armenian cognac in return. One of the most thoughtful gifts ever was the one given by ex Prime Minister Gordon Brown to Barack Obama. He proudly presented the president with a **pen holder** made from the **timbers** of the Victorian **anti-slavery ship**, HMS Gannet.

Unfortunately for Brown, the presents he received weren't quite as impressive: two models of the presidential

helicopter (Marine One) for his sons, and a box set of 25 DVDs of classic American films. It later **transpired** that the DVDs were **incompatible** with British DVD players, so he couldn't watch them.

Poor old Gordon! ☹️

FREE HUGS – THE STORY!

Would you ever hug a stranger? There's actually a movement that promotes free hugs that's known as the Free Hugs Campaign. Unfortunately, despite all the love, it didn't end too well.

The Free Hug Campaign is a social movement that involves offering strangers hugs in public places. They're meant to be **random acts of kindness** just to make you feel good. The person offering the hugs often makes a sign that reads "FREE HUGS", then holds it up in the street and waits for someone to ask for a hug.

The campaign was started by Australian **Juan Mann*** in 2004. Juan had been living in London for almost a decade when he decided to return to Sydney after his girlfriend **called off** their **engagement**. On landing, he had nothing but his suitcase.

After about three months, an old friend invited him to a party. In an interview with WHO magazine, Juan said that while he was at the party, "...a completely random person **came up to me** and gave me a hug. I felt like a king! It was the greatest thing that ever happened." Then, he had an idea.

On 30th June 2004, Juan made a sign with the words FREE HUGS and offered his first hugs in the centre of the main shopping district in Sydney. "For the first 15 minutes, people just **stared right through** me. But then a woman **tapped** me on the shoulder and told me she needed a hug as it was the

anniversary of the death of a relative," said Juan. Things really took off after a FREE HUGS video was **uploaded** to YouTube. While in Sydney, Juan met Shimon Moore, an American musician. Shimon filmed Juan giving away free hugs. In mid-2006, Juan's grandmother died, and in **consolation** Shimon used the **footage** he had shot to make a music video for the song All the Same by his band The Sick Puppies. The video was later uploaded to YouTube, where it has been viewed over 70 million times.

As a result of the video, the Free Hugs movement became international. Branches were opened in Taiwan, Italy, America, Switzerland, Norway, India, Portugal and the UK. Juan was invited to tell his story on the Oprah Winfrey Show. A website (www.freehugscampaign.org) was launched in mid-2007, and an annual International Free Hugs Day was set on the first Saturday following 30th June as this was the anniversary of the first time that Juan ever offered free hugs in Sydney. Juan also wrote a book (The Illustrated Guide to Free Hugs), became an after-dinner speaker and published his address and mobile-phone number online, offering to go for a meal with anyone who contacted him.

Off the back of the YouTube video, Shimon and his band got a **record deal**, and they often sold Free Hugs **merchandise** at their concerts such as T-shirts and mugs with Juan's **distinctive** handwriting. But in an interview Juan gave to a New

York-based business news website in 2010, Juan said that all the **earnings** went straight to Shimon and his band members. "Needless to say," Juan continued, "we aren't friends anymore... I haven't seen a dollar from the band or the manager."

Perhaps they should give each other a hug! ☺

*JUAN MANN

This isn't his real name but it stands for "One Man", according to the pronunciation of "Juan".

GROUP TALK

CHATTING ABOUT REGRETS!

Answers on page 44

1 Listening I

You're going to listen to some people talking about regrets in their lives. What regrets do you have in life? Make a list. For example: *I should have studied harder at university; I wish I'd done some more travelling while I had the chance; I'd have loved to have studied abroad for a couple of years...* Then, listen once to compare your ideas. Were any of the things you thought of mentioned?

2 Listening II

Listen again. Then, answer the questions.

1. What's the saying the female speaker mentions at the start of the conversation?
2. What does she think about the saying?
3. What regret does the speaker who says he was an athlete have?
4. What does the female speaker say about that?
5. What regrets does the man have about not being a professional athlete?

Audio script

Luisa: OK. So, I heard this saying once that it's better to regret something you *have* done than something you *haven't* done. What do you think?

Jackson: Mmm... Depends on what you've done.

Andre: Is it something bad? Is it something evil?

Luisa: Well... I don't know. I'm asking the question. I mean... I... Personally, I think it's a bit... it's better to regret something... erm... that you *have* done. Yeah. Because I think it means you've lived life.

Jackson: What if you've done something really stupid?

Luisa: Well... Yeah, that's true. That's true. It does depend on what you've done. That's true.

Jackson: Exactly. [Well...] Have you guys done anything really stupid?

Andre: Well, of course. I've done lots of stupid things. But I agree with Luisa. Maybe it's good to regret something that you've done and maybe you haven't put 100 percent of your effort into.

Luisa: Mmm...

Jackson: Yeah.

Andre: For example, I was an athlete when I was very, very young, [Yeah] and maybe if I had tried harder [Mhm] I would have been a little bit better at what I had done.

Jackson: And maybe you'd now be competing in the Olympics [Exactly!] this year!

Andre: I'd be training right now!

Jackson: Really?

Luisa: Yes, but then you could be regretting spending the whole of your life just in difficult training schedules and never

having any fun and never just... you know... eating an ice cream on the beach.

Andre: This is true!

Jackson: Exactly! Now you have a better life. You have more fun. You don't... you don't, you know... Do you sit around regretting that you're... you know... that you're not a professional athlete?

Andre: No, absolutely not. I think things have turned out very, very well.

Jackson: Well, you look happy.

Andre: I'm a very happy guy. And you?

Jackson: Yeah, I'm happy! I mean, I'm full of regret, but I'm still happy.

Andre: Do you have anything you wish you would have tried harder at?

Jackson: Absolutely nothing.

Andre: Absolutely nothing? ☹️

Top tip: how to listen

The most important thing to remember when listening to a conversation is that you won't understand every word. So, you should only listen out for the key words – the most important words in the conversation: the nouns, verbs, adjectives, etc. Then, you can use your intuition to fill in the gaps – just as you do in your own language. Knowing the context and topic of the conversation will help with this.

Objective To teach you some slang words and expressions.

Think about it When was the last time you had a chat about politics? Who were you with? What did you say? What's your general opinion of politicians? What do you like or dislike about politics or politicians in general? Who are some of the worst or best politicians in your country?

SLANG CONVERSATION POLITICS

Warning
Many of the words and expressions from this section are used in informal situations. So, be careful how you use them yourself!

Mike and Bob are at the pub, chatting about politics. Listen once and answer these questions:

- Who has Mike voted for in the election?
- What does Bob think of this?

Then, listen again and try to guess the meaning of the following slang expressions (also marked in bold in the text). Write out a version of them in Standard English:

	Slang expression	Standard version
1	Gutted	
2	To boot out	
3	Way out	
4	To shaft	
5	Crap	
6	Scum	
7	To bang up	
8	Bastard	
9	A sleaze bag	
10	A bunch of	
11	With their snouts in the trough	
12	They don't give a shit about	
13	Us lot	
14	A mate	
15	A piss-up	
16	A waste of space	
17	Doesn't know his arse from his elbow	
18	Tie the knot	

Dialogue

Mike and Bob are in a pub. They're chatting about the latest election results. **M=Mike B=Bob**

- M:** So, what did you think of the election result?
- B:** I was **gutted** that the government got in again.
- M:** Pretty predictable though. I mean, with the economy picking up, and the opposition's plans to raise taxes.
- B:** I was hoping to see them get **booted out**. Those opinion polls were **way out**. So, it looks like another five years of cuts with the government **shafting** us left right and centre.
- M:** The usual **crap**. Hey, did you hear about the MP with the million-dollar bank account in Lichtenstein that he hadn't bothered to declare?
- B:** **Scum!**
- M:** But he still managed to get voted in. They should have **banged him up** for a few years.
- B:** Thieving **bastard**.
- M:** Such **sleaze bags**, some of them.
- B:** They're all just a **bunch of pigs with their snouts in the trough**.
- M:** Yeah... most of them, at least.
- B:** **They don't give a shit about us lot** – the little people.
- M:** No, just helping out their **mates**. But you know what? I blame that twat in opposition. He's about as useless as a chocolate teapot in the desert.
- B:** Yeah, he couldn't organise a **piss-up** in a brewery.
- M:** I wouldn't trust him as far as I could spit.
- B:** I wouldn't spit on him if he was on fire. He's a complete **waste of space**.
- M:** **Doesn't know his arse from his elbow**.
- B:** [silence] So, who did you vote for?
- M:** The government.
- B:** What? I thought... How could you? What about your principles?
- M:** Well, you know how it is. They promised to bring down income tax for married couples, and as Shirley and I are about to **tie the knot**, it seemed like the logical thing to do.
- B:** Yeah, very logical! Traitor! 🗡️

Yes or no? The Scottish independence debate!

The Scottish referendum took place on 18th September 2014. In the end, about 45% of Scots voted in favour of independence, with more or less 55% voting against a break-up of the **Union**. **Voter turnout** was extremely high at 84.5%. So, what were the arguments for and against independence?

In favour of Scottish independence:

There are three main arguments in favour of Scottish independence. Firstly, with independence Scotland's problems will be dealt with by Scottish people. At the moment, most important decisions are taken in Westminster (London), the **seat** of the UK **parliament**. Worse, although the Tories (the centre-right-wing Conservative party) are quite popular in England, there's only one Tory MP from a Scottish **constituency**. As Alex Salmond often said during the campaign, there are more pandas in Edinburgh zoo (2) than Tories in Scotland (1).

Secondly, Scottish nationalists want a nuclear-free Scotland, with the removal of nuclear submarines (armed with **Trident** missiles) from the Faslane naval base near Glasgow. They also want to focus on renewable forms of energy such as wind. Finally, Scottish nationalists want control of their oil resources. No one is sure how much oil there is left in the North Sea, and figures vary from 10 billion to 24 billion **barrels**, but nationalists believe that with oil, Scotland has the potential to be one of the richest nations in the world.

Against Scottish independence

A lot of the arguments against Scottish independence were based on negative scenarios. An independent Scotland, they claimed, would have to leave the **EU** and negotiate its entry, would see many businesses and banks relocate to England, and would have no **viable** currency if they kept the pound as it's controlled by the Bank of England (so Scotland would have no influence over interest rates, for example).

However, it wasn't all **doom and gloom**. The

campaign also focused on the arguments for staying in the Union, referring to all the institutions that have been built up over the years, including the British parliament, the Royal Family, the British civil service, the BBC, the armed forces, the British Red Cross and the NHS (the National Health Service), although many in Scotland fear that the NHS is **under threat** from a Tory government because of their plans for privatising parts of it.

At the last minute, David Cameron made a passionate speech for Scots to stay in the Union, which he described as, "The greatest example of democracy the world has ever known". He added that the break-up of the Union "would be the end of a country that launched the **Enlightenment**, that abolished **slavery**, that drove the **Industrial Revolution**, that defeated fascism... The end of a country that people around the world respect and admire, the end of a country that all of us call home."

In the end, the Scots voted against independence, but the movement for "freedom" is now stronger than ever. Who knows what will happen in the future? ❖

I'M WATCHING YOU!

Secret organisations & world domination!

The 9/11 terrorist attacks in New York in 2001.

The BP oil spill in the Gulf of New Mexico. The disappearance of Malaysia Airlines Flight 370 in March 2014. Some **conspiracy theorists** believe these events, and many others, were caused by a secret organisation that wants to dominate the world. So, what's going on?

One such organisation is known as the Illuminati. Conspiracy theorists claim the Illuminati want to create a New World Order and take over the planet. As **proof** of this, they point to the creation of global institutions such as the International Monetary Fund (1944) and the United Nations (1945). Some even believe that the Illuminati are capable of mind control through the use of microwave signals that can send thoughts into your head. And the only way to stop this is to wear a **tin foil** hat, which is what some people actually do.

Many believe that the Illuminati deliberately cause wars and natural disasters. For example, they believe that a nuclear bomb was used to **trigger** the **earthquake** and tsunami that devastated the nuclear reactor at Fukushima in Japan in March 2011. This was supposedly designed to reduce Japan's power and influence in the region. They even claim that events from the past such as the French Revolution (1789), the Battle of Waterloo (1815) and JFK's assassination (1964) were all part of the **plot** for world domination. Members of the Illuminati allegedly include presidents, prime ministers, bankers, kings, queens, generals and members of parliament.

One of the most famous conspiracy theorists is David Icke. He has written several books on global politics, including *The Biggest Secret* (1999) and *Children of the Matrix* (2001). According to his theory, the world is controlled by a secret group of **reptilian humanoids**. These 1.5 to 3.7 metre aliens are from the Alpha Draconis star system and are now hiding in underground bases, or have taken on a human form to control society.

Icke has claimed that many world leaders are reptilians, including George W. Bush (ex president of the USA), Queen Elizabeth II of the United Kingdom and the **Queen Mother**, who, according to Icke, ritually **sacrificed** babies. Icke's conspiracy theories have supporters in over 40 countries; and he often gives talks to **crowds** of up to 6,000 people. A **poll** in America in 2013 by Public Policy Polling showed that 4% of registered voters believed in Icke's ideas.

Icke became the object of **ridicule** after a press conference in 1991 in which he announced that he was a son of the "Godhead" and that the world would end in 1997. This would be **preceded**, he said, by a number of disasters, including eruptions in Cuba, an earthquake on the Isle of Arran and the complete disappearance of New Zealand. He told reporters the information was being given to him by voices and automatic writing. Luckily, he was completely wrong.

Meanwhile, keep wearing those tin foil hats! ☘

ILLUMINATI & THE ONE-DOLLAR BILL

An Illuminati symbol appears on the American dollar bill, with the "all-seeing eye" in a pyramid. The symbol is supposed to represent providence (destiny). The Latin phrase "novus ordo seclorum" also appears on the bill. It translates as "New Order of the Ages" but some say it means "New World Order".

ILLUMINATI

A real group called the Illuminati was a secret society in Bavaria (in modern-day Germany) that was founded on 1st May 1776. Among many other things, they were opposed to religious influence in public life and the abuses of state power. They were disbanded in 1785.

WHAT CAN WE LEARN FROM WORLD WAR I?

OH, WHAT A LOVELY WAR!

World War I lasted from August 1914 until November 1918. More than 16 million people died, and over 20 million were wounded. So, is there anything we can learn from it?

The war started because one man died. It really was that simple. A series of **alliances** and **treaties** between empires and countries meant that one single **assassination** led to a war involving millions of soldiers and more than 130 countries from all over the world. On 28th June 1914, Archduke Franz Ferdinand, the **heir** to the **Austro-Hungarian Empire**, was assassinated in Sarajevo by Gavrilo Princip, a member of a Serbian nationalist organisation

that wanted to keep Austria-Hungary out of the **Balkans**.

On 28th July 1914, and in response to the assassination, Austria-Hungary declared war on Serbia. Russia then **mobilised** her army in defence of Serbia. Germany, allied to Austria-Hungary by treaty, saw the mobilisation as a **threat** and declared war on Russia on 1st August. In turn, France found itself at war against Germany and Austria-Hungary because of a treaty with Russia. Then, after Germany invaded neutral Belgium as part of an attack on France, Britain was obliged to declare war on Germany (which it did on 4th August) because of a promise to defend Belgium under the Treaty of London of 1839. The war had started.

World War I was a war like no other. For the first time, tanks, aeroplanes, and submarines were used **on a large scale**. And the conflict was truly horrific. For example, around 60,000

British soldiers were killed or injured on the first day of the Battle of the Somme – that's 60,000 in just one day! Poison gas was also used to kill, **maim** and **blind** terrified soldiers from both sides. Worst of all, World War I became a war of **attrition** in which generals ordered the soldiers to keep on attacking, regardless of the loss. So, instead of capturing strong points or **out-maneuvring** the enemy, the objective was simple: kill as many of the enemy's troops as you can, and hope that you've got some soldiers left at the end.

So, did anything positive come out of the war? World War One helped advance women's rights. During the war, women found work as nurses, bus drivers and workers in **munitions** factories, among many other things. After the war, the 1918 Representation of the People Act **enfranchised** 8.5 million women (those over the age of 30), giving them the vote for the first time. And the Sex Disqualification Act of 1919 made it illegal to exclude women from jobs because of their **gender**.

And what can we learn? Some feel that the act of remembering is the best way to prevent future horrors. The photos, poems and memoirs from World War I serve as a vivid reminder of the devastation. And every second Sunday in November on Remembrance Day (or Remembrance Sunday) ceremonies are held to

commemorate the end of the war and honour the dead. As part of the celebrations, people often wear a red **poppy**. During the war, the troops noticed how poppies often grew on the battlefields over the bodies of the dead soldiers. Very soon, the red flowers became a symbol of remembrance of the past and hope for the future.

*They shall grow not old,
as we that are left grow old:
Age shall not weary them,
nor the years condemn.
At the going down of the sun
and in the morning,
We will remember them.*
[From Laurence Binyon's poem, *For the Fallen*]

I think... In my opinion... I'm convinced that... I'm sure that... It's my firm belief that... I'm absolutely sure that... Without a doubt, the best thing would be to...

Now, use the expressions to give your opinions on the following ideas.

- Accepting a job in a foreign country.
- Having a factory located in another country (in the Far East, for example).

- Alisha:** Honestly, I think people are more concerned about (9) _____ is going to cost them than any feelings of patriotism because...
